Standing on the shoulders of giants

Open source is the cooperative, open and global demonstration of technology combined with knowledge transfer and proof.

The scientific consensus on which our prosperity is built upon, uses the same principle.

"Knowledge is a collective tradition"

- Vandana Shiva

"If I have seen further it is by standing on the shoulders of Giants."

- Isaac Newton

Evolution in Open Knowledge Creation

- ♦ 70 % of the worldwide code base is based on open source [1]

Climate Change - A Challenge in Collaboration

How can we spread knowledge, accelerate innovation and increase cooperation in sustainable technologies?

Truly Sustainable is Open

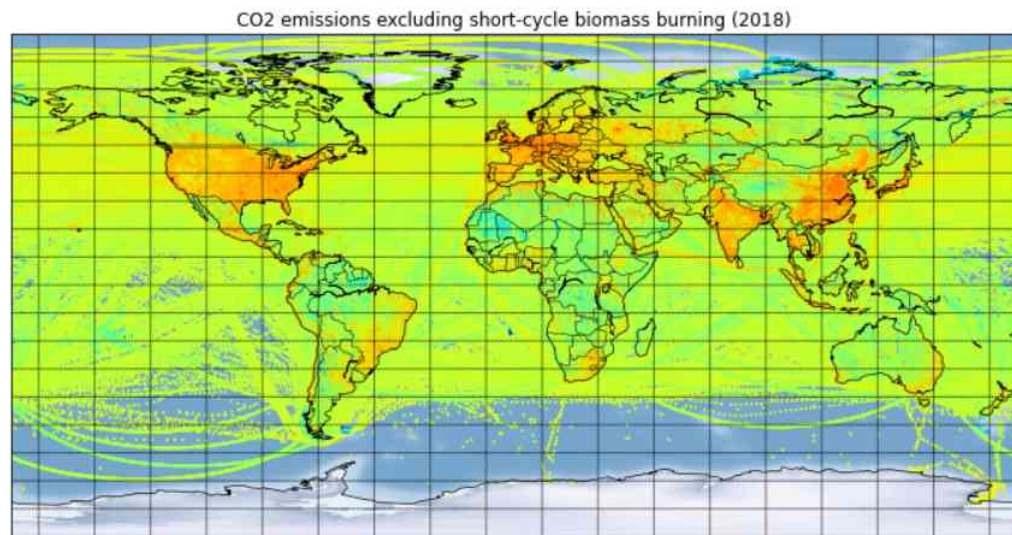

Only by exchanging sustainable technology and knowledge worldwide the impact of climate change can be reduced in the long term.

Open Collaboration and development methods have shown fast acceleration of nearly all knowledge based industries.

Independent and open technology gives us a real chance to reach global climate targets.

Amplification of Sustainability through Open Practices

Transparency and Trust

Today, sustainability is massively misused for marketing purposes. Through the publication of "Life Cycle Assessments" and the resulting resource requirements, products and services can actually be considered sustainable.

Knowledge Evolution and Adaptation

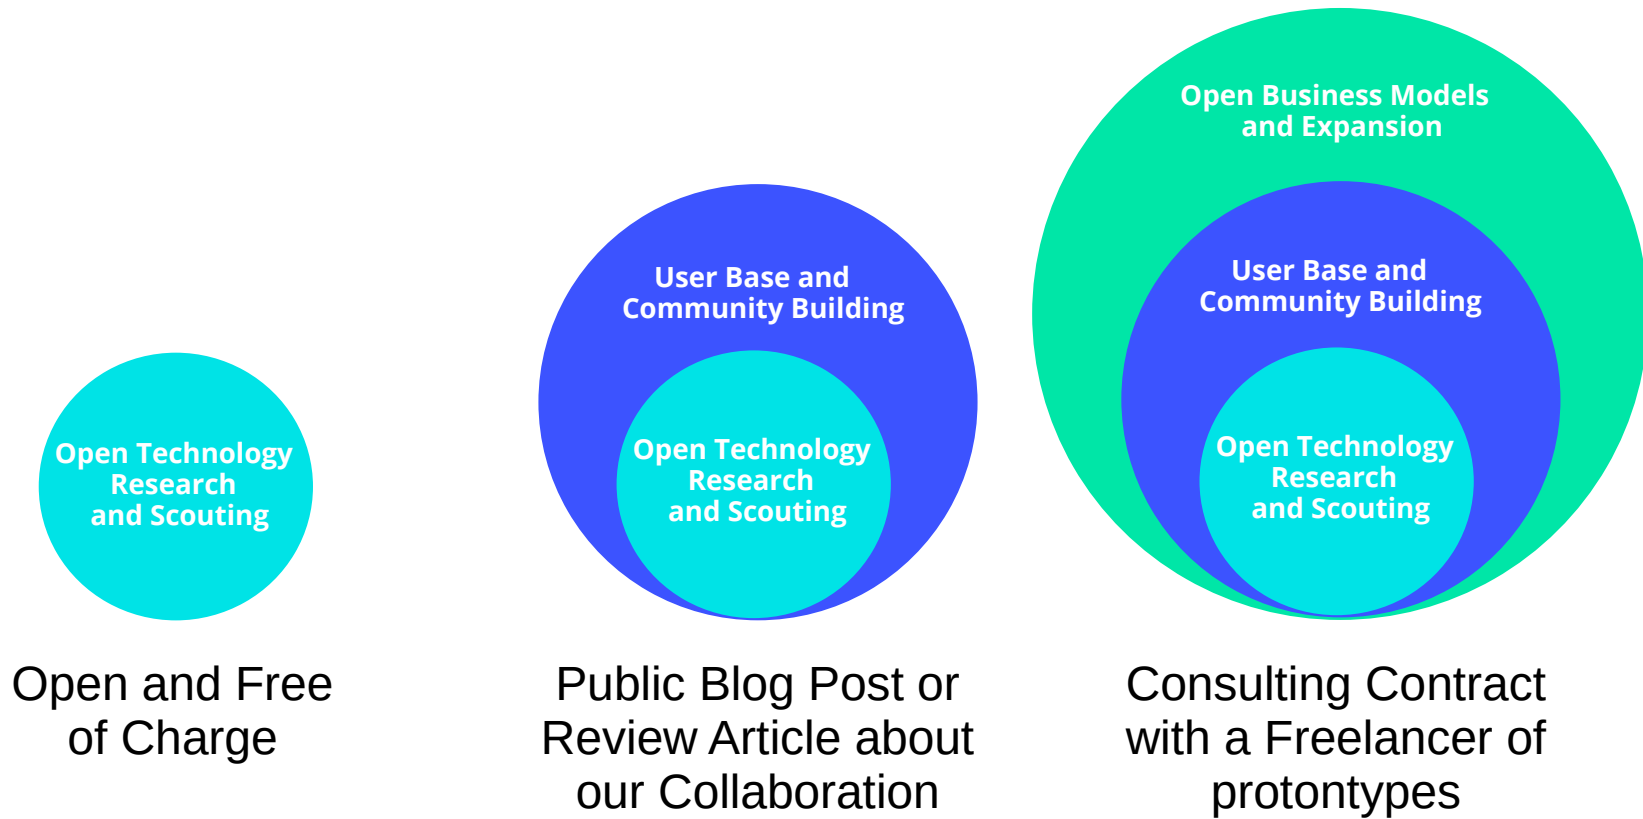

By exchanging sustainable technology and knowledge worldwide the impact of climate change can be reduced in the long term on a global scale.

Open Business Models

Open business models such as "Open Core" have shown massive scaling effects in recent years. They create ecosystems with fewer monopolies, higher innovation power and free market participants. At the same time, they enable customers to be directly involved in product development.

Our Open Core Business Model

An independent and open community supporting research and business development based on free and open principles.
